

RUSVENT

We build together with you!

**Leaders of “Serpukhov
electromechanical factory” were
the originators of “RUSVENT” in
the year 2005. History of our work
is closely connected with our
creator.**

OUR PARTNERS

OUR PRODUCTS

Equipment for general ventilation systems

In-line fans

In-line fan VK

Square
Duct fans VRPP 600-10000
m³/hour

Square duct fans
VRPV-N
1500-12000 m³/hour

Roof fan

Roof ventilator VKR

Centrifugal fan

Low pressure radial ventilator VR 80-75

Air Curtain

Wide-jet air curtain
"KLIM"

Air Valve

Air Throttle
ZV-00

Aluminium screens

Ventilation screen

AIR-HANDLING UNIT

Depuration

Humidification;
Heat recovery

Heating/Cooling

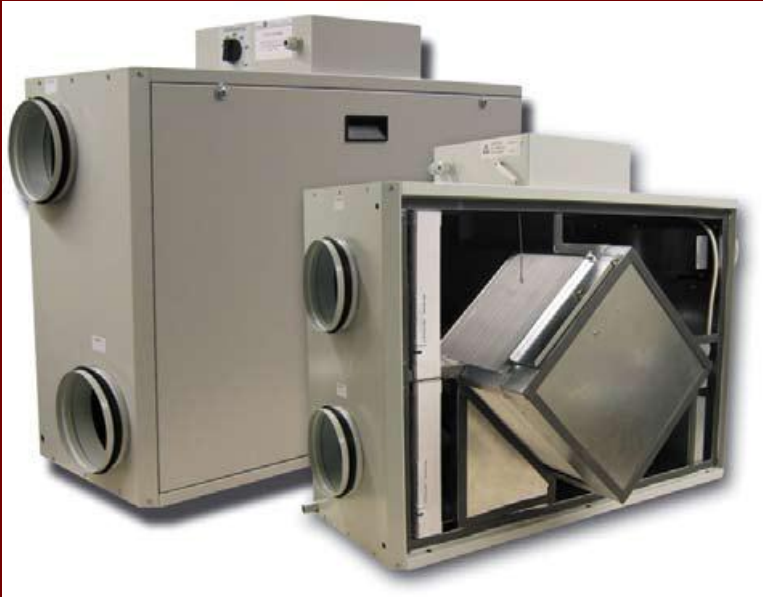

Recuperation / Recirculation

Automatic control system of air-handling unit:

- With water heating and regulating cock (SUPV-1);
- With water heating and stop cock (SUPV-2);
- With resistance heating (SUPV-3);
- With power cabinet (SUPV-4);
- With frequency speed regulator (SUPV-5)

COMPACT AIR-HANDLING UNITS WRG

Advantages:

- Packaged design;
- Possibility of horizontal and vertical installation;
- Possibility of incoming air supply regulation;
- Heat saving with the help of lamellar recuperator;
- Filtration of outer air from dust;
- Good sound-proofing which provides low noise level.

Used for ventilation systems in offices, flats and small cottages

Equipment for smoke ventilation systems

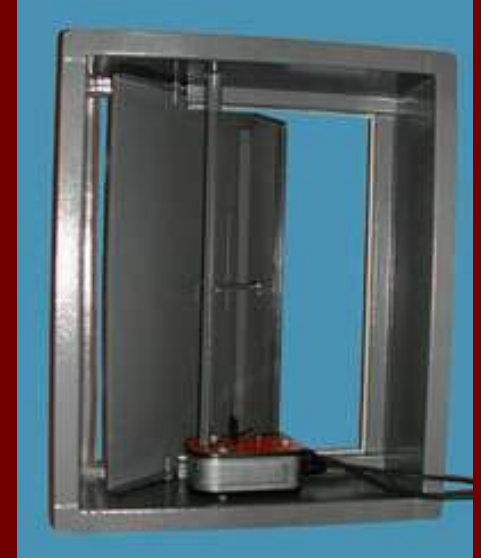

Fire dampers

Fire damper
KP-1 EI60

Combined fire dampers KP-1 (EI 90)

Smoke exhaust fan
KDF-1
with falling shutter

Smoke exhaust fans

Axial fans
VO-21-210 DU

Roof fans
VKRN-F DU

Wall-mounted fans
VRP DU

Doors, gates, hatches

Metal fireproof door

Horizontal hatches

Air-tight doors and hatches

Основные группы товаров

Общеобменная вентиляция:

- Приточные установки
- Канальные вентиляторы
- Радиальные вентиляторы
- Крышные вентиляторы
- Воздушные завесы
- Воздушные клапаны
- Вентиляционные решетки
- Гибкие воздуховоды

Противодымная вентиляция:

- Противопожарные клапаны
- Клапаны дымоудаления
- Вентиляторы дымоудаления

Промышленная автоматика:

- Приводы
- Системы автоматического управления

Запорная арматура:

- Затворы
- Краны

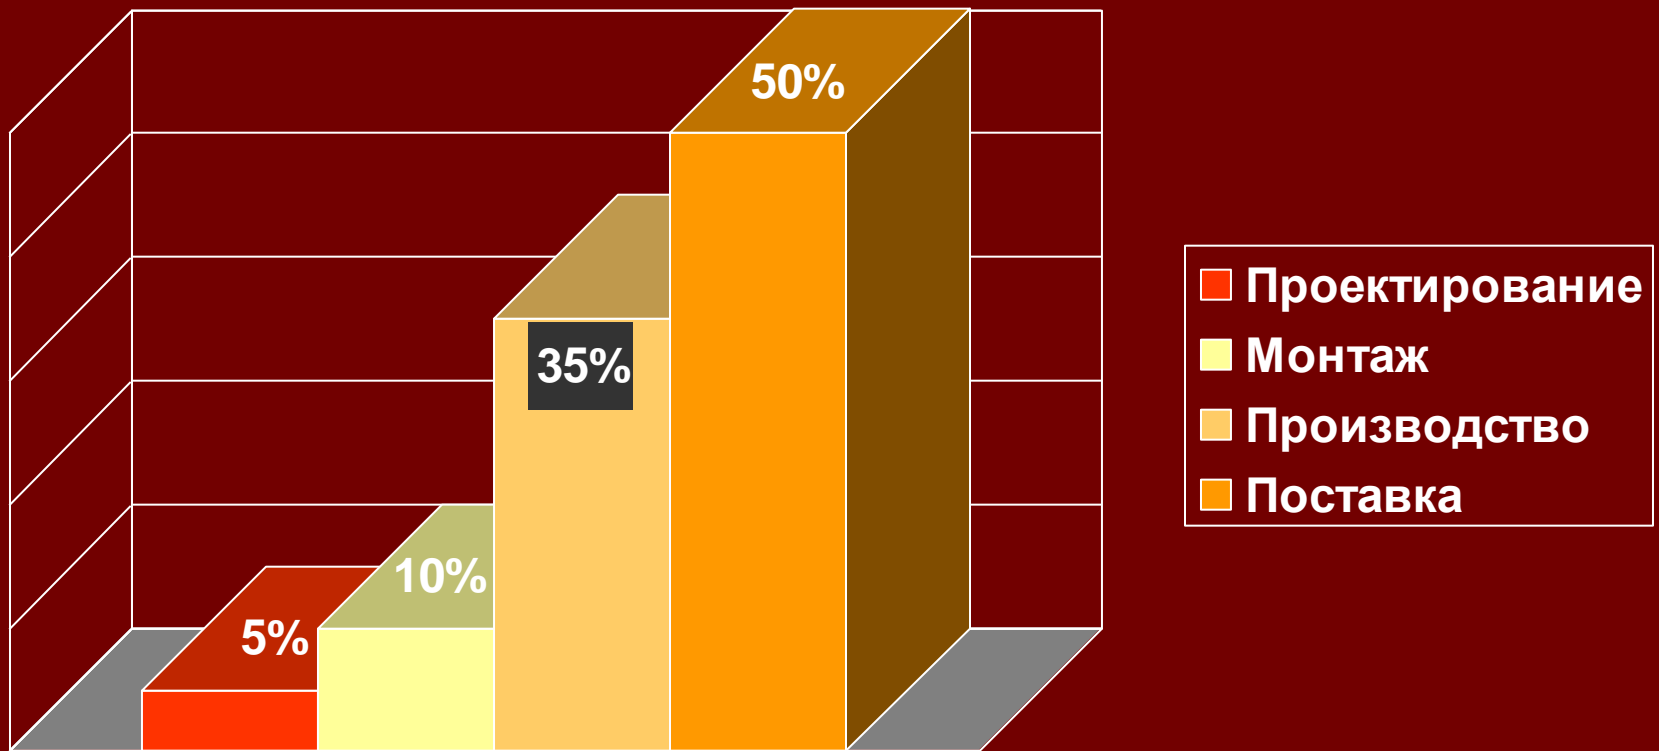

Двери, ворота, люки

It is easier to breath with us!

The equipment to solve

- To provide meteorological conditions permissible within working area or service zone
- Smoke removal & fire control in ventilation
- Open space and inside fire blocking

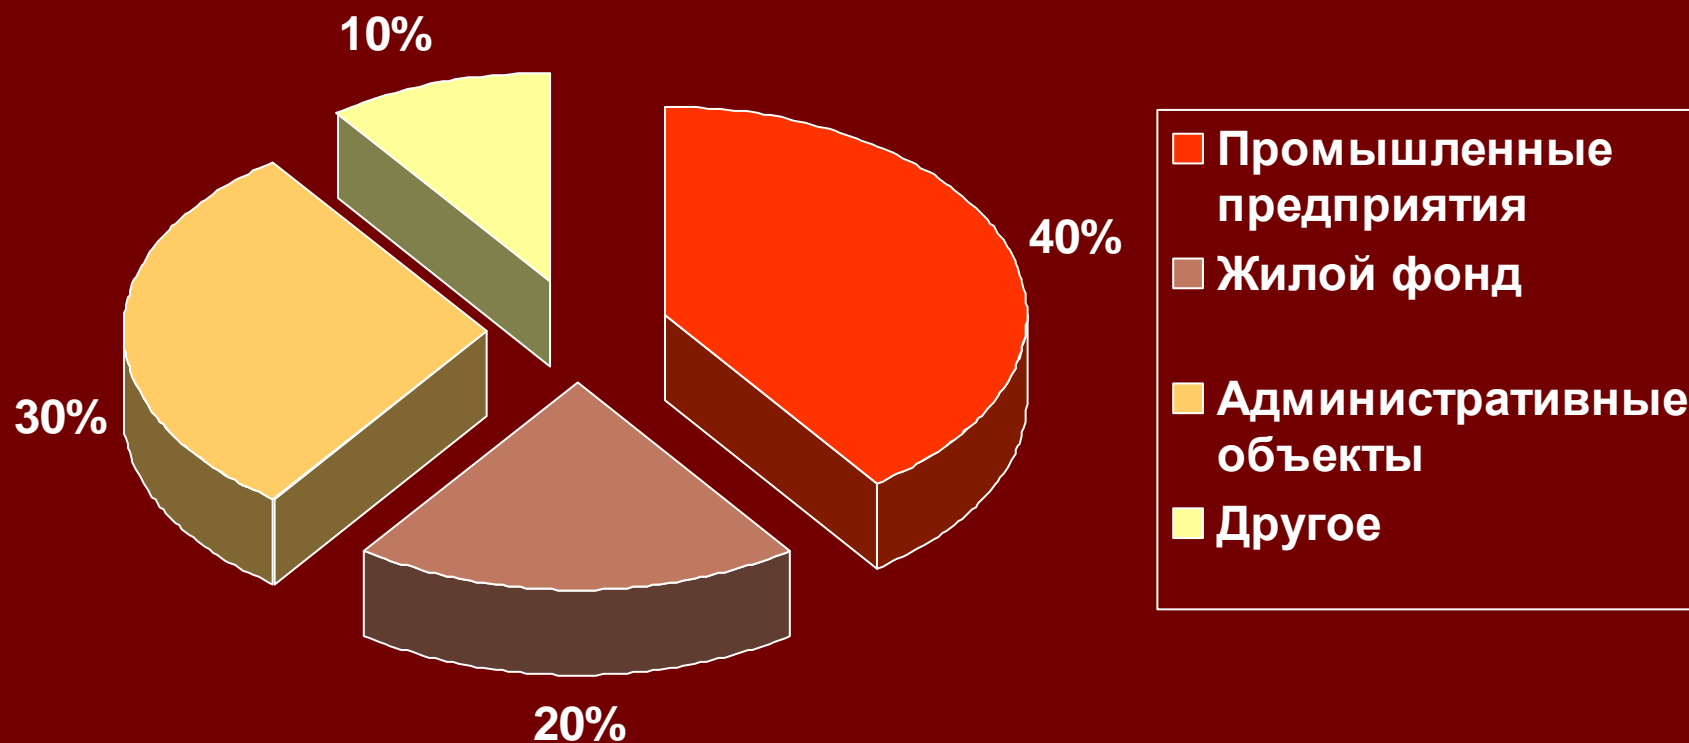

Development, assembly, production, delivery

ОСНОВНЫЕ УСЛУГИ

- Manufacture and sales
- Development
- Assembly
- Door-to-door delivery
- Instant selection of the equipment under design documentation requirements
- Terms and quality control
- Information support on installation and equipment operation
- Complex maintenance of the site with the ventilation and fire-prevention doors systems
- Chief-installation

Our experience at your service!

RUSVENT experience is presented in the successful work at the following facilities:

Nuclear Energy State Corporation
«Rosatom»

Igarka Airport

Plastic Geosintetika

Moscow University of
Ministry of Internal Affairs
of the Russian Federation

International Airport
in Krasnodar

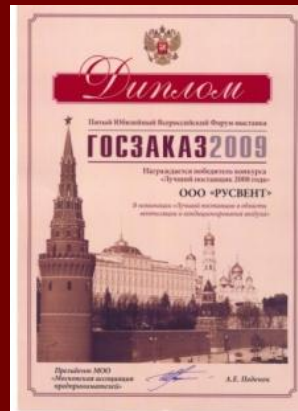

Health resort for children
«Yunost'»

Россия, Беларусь, Казахстан, Молдова
